

EDUCATION

Cornell Tech, Cornell University New York, NY
MS in Design Technology, GPA: 3.7/4, Merit Scholarship May 2026
Relevant Coursework: Design & Making- Across Disciplines, Design for Physical Interaction, AI & Design, Anthropocentric Model-
Cooperative Robotics, Sustainable Urban & Energy Delivery Systems, Transformable Design

Savitribai Phule Pune University Pune, Maharashtra, India
Bachelor of Architecture, First Class with Distinction, GPA: 8.87/10 May 2023
Relevant Coursework: Architectural Design & Graphics, Building Technology & Materials, Building Services

TECHNICAL SKILLS

Digital Fabrication: Robotic Fabrication (ABB IRB 210 L) 3D Printing, CNC, Lazer Cutting, Vinyl Cutting, Molding & Casting
3D Modeling & Rendering: Rhino, Grasshopper, Fusion 360, AutoCAD, Revit, Adobe (Photoshop, Illustrator, Premiere)
Coding Language: Python, P5.js, Unified Modeling Language
Other Tools: TensorFlow, Panda power, OpenDSS, EDGE

PROFESSIONAL EXPERIENCE

Cornell Tech, MakerLAB, Teaching Assistant, New York, NY June 2025- July 2025

- Led hands-on workshops on rapid prototyping techniques and safe operation of fabrication equipment.
- Guided students in designing interactive devices using sensors, microcontrollers, and physical computing methods.
- Provided individual technical support to resolve modelling, fabrication, and prototyping challenges during studio sessions.

Ranjit Estates & Developers, Partner, Pune, MH, India Sept 2023- April 2024

- Met stakeholders and architects to translate redevelopment requirements into clear design and regulatory specifications.
- Coordinated legal reviews and approvals while streamlining communication across shareholders and consultants.
- Conducted floor-plate calculations, feasibility studies, and comparative redevelopment analyses for project planning.

PROJECTS

Radical Prototype, Modulon Fall 2025
Proposed a multifunctional brick that generates energy, filters water and cleans air as a building-scale infrastructure unit.

- Developed concepts for a modular brick combining solar generation, water filtration, and air cleaning.
- Created a detailed catalogue of drawings illustrating geometry, internal systems, and building-scale deployment scenarios.
- Designed speculative prototypes to communicate system behavior, assembly logic, and potential urban applications.

Cornell Tech, Product Studio/ Thermal Shell Fall 2025
Proposed a thermal-retrofit system that detects heat leaks and generates custom 3D-printed insulation layers.

- Applied, understand-ideate-select-validate framework to define, refine, and test the retrofit solution.
- Conducted domain research on LL97 rules, building heat-loss behavior, and property-manager operational constraints.
- Created mockups and early prototypes to test scanning workflows & diagnosis stages.

EXTRACURRICULAR ACTIVITIES /VOLUNTEER

Cornell Tech, MakerLAB, Super Maker, New York, NY Aug 2025-Present

- Assisted graduate students in translating project ideas into functional prototypes using MakerLAB tools and equipment.
- Supported safe and effective use of fabrication tools while learning advanced machines such as the waterjet cutter.
